

RUNDELL ERNSTBERGER ASSOCIATES

Addendum #1

Date: August 7, 2024
Project Number: 2024-1759
Project Name: Town of Cambridge City Fire Station Park

This addendum is being issued prior to the date for receiving bids.
The modifications, additional data and specifications included herein shall be incorporated into the Project Manual for the above-mentioned project. All other provisions of the Drawings and Specifications shall remain unchanged.
This addendum is issued in accordance with the provisions of Information for Bidders section of the Project Manual. All bids shall be based upon work as modified by this Addendum or Prior Addenda.
Acknowledge receipt of this Addendum on the Bid Form. Failure to do so may subject the bidder to disqualification. This addendum forms a part of the Contract Documents.

GENERAL COMMENTS & CLARIFICATION

- Item #1: Kleinpeter Consulting Group LLC is the grant administrator for the project. Please add Mike Kleinpeter as a contact for contracting requirements and questions. Mike Kleinpeter, mike@kleinpeterconsulting.com, 812-525-7080. Please refer to the Pre-Bid Conference Guide provided by the Indiana Office of Community and Rural Affairs (OCRA) for specific state and federal requirements. The guide will be included with Addendum 1.
- Item #2: See Pre-Bid Meeting Agenda and Sign-In Sheet attached to Addendum 1 for reference.
- Item #3: Please note that bids will be opened on August 12th during the regular Town Council meeting. Bids will be taken under advertisement and the project is anticipated to be awarded at the September 9th Town Council meeting
- Item #4: Please note a gas line is present parallel to Green Street within the park property. It is not indicated on the topographic and boundary survey, but above-grade markers indicate its location on-site. The utility is believed to be located beneath the area of proposed asphalt. The elevation of the utility is believed to be deep and no relocation is anticipated. The contractor will need to field verify location during construction.

PHONE, EMAIL, AND PRE-BID MEETING QUESTIONS & ANSWERS

- Question #1: Are the requirements for painting and roofing materials for the Pavilion included anywhere within the contract documents.
- Answer #1: Yes, refer to the Specifications included on Sheet G002 - Project General Notes, Abbreviations, and Symbols.

REVISIONS TO THE SPECIFICATIONS

- Item #1: 32 9115 - Soil Preparation

DELETE existing specification section 32 9115 - Soil Preparation and **INSERT** attached revised specification section 32 9115 - Soil Preparation.

Item #2: Appendix A - Wage Determination
DELETE existing specification section Appendix A - Wage Determination and **INSERT** attached revised specification section Appendix A - Wage Determination.

REVISIONS TO THE DRAWINGS

Item #1: E600 - Electrical Riser Diagram and Schedules
DELETE existing sheet E600 - Electrical Riser Diagram and Schedules and **INSERT** attached revised sheet E600 - Electrical Riser Diagram and Schedules.

Item #2: G002 - Project General Notes, Abbreviations and Symbols
Under Specifications, 3, Metal Soffit, **ADD** Omnis, ForMe, Joel Brummel, joel.brummel@omnisusa.com, 269-720-1406 as an alternate provider. Contractor shall meet all requirements of the basis of design product.

Item #1: Office of Community & Rural Affairs Pre-Bid Conference Guide

Item #2: Pre-Bid Meeting Agenda

Item #3: Pre-Bid Sign-In Sheet

Item #4: Specification Section 32 9115- Soil Preparation

Item #5: Specification Section Appendix A - Wage Determination

Item #6: E600 - Electrical Riser Diagram and Schedules

END OF ADDENDUM #1

Pre-Bid Conference Guide

For Construction Projects
funded wholly or partially by the
Community Development Block Grant
Program.

Grant Services Division
One North Capitol, Suite 600
Indianapolis, Indiana 46204

800-824-2476

Revised November 2023

PRE-BID CONFERENCE GUIDE

GENERAL INFORMATION

- The Grantee must receive a “Release of Funds” letter from OCRA before awarding any construction contracts.
- Prior to contract award, prime contractors must be actively registered in SAM.gov. Alternatively, provide documentation from SAM.gov that registration has been initiated. A copy of the applicable wage decision and the Federal Labor Standards Provisions (HUD-4010) must be physically attached to the contract that the grantee signs with the Prime contractor. The HUD-4010 must be included with all subcontractor contracts.
- The principal contractor (prime or general contractor) is responsible for the full compliance of all employers (the contractor, subcontractors, and any lower-tier subcontractors) with labor standards provisions applicable to the project. If the contractor or any subcontractor fails to comply with all applicable regulations, funds shall be withheld from the prime contractor until all requirements have been met.
- The Build America Buy America Act applies to all infrastructure projects. Under the Buy America Preference, the selected contractor is responsible to procure iron and steel, construction and manufacture materials produced in the United States.
- This project is subject to all federal and state laws, regulations and guidelines pertaining to public works projects in Indiana.

LABOR STANDARDS

1. The grantee may not enter into a contract with any contractor or subcontractor that has been debarred, suspended or is otherwise ineligible to participate in federally funded contracts or programs. The Grant Administrator must verify the eligibility status of all contractors before work is performed on this project. Any contract awarded to a prime contractor or subcontractor that is found to be ineligible for award will be terminated immediately. *HUD Handbook 1344.1 REV-3, (Ch. 5-5).*

Workers must receive hourly fringe benefits and/or a cash equivalent for all hours worked, including overtime. For workers that perform work in excess of 40 hours, all contractors and subcontractors must pay workers time and one half of the base wage rates listed on the wage decision for all hours worked over 40. Fringe benefits are to be paid straight time.

2. The Copeland Anti-Kickback Act makes it a Federal crime for contractors and subcontractors to coerce or intimidate any laborer or mechanic to relinquish or give up or pay back any of their wages earned on this project. This Act also requires the submission of weekly certified payroll reports (CPR) and signed statements of compliance and regulated permissible payroll deductions (Contractors Guide to Prevailing Wage Requirements, Section 1-1).
3. Payroll records must be kept for at least three years after grant closeout.
4. Payments made by a contractor to an employee must be verifiable. Payments may not be made with an I.O.U., equipment, or any other form of barter.
5. All contractors and subcontractors must submit signed weekly certified payroll reports (CPR) to the Grantee through the Grant Administrator within seven days after regular payment date of the payroll period. Certified payroll reports will be labeled with “initial” and “final” as appropriate. Best practice: label each certified payroll report in succession.
6. No contractor or subcontractor shall employ workers on this project under the age of 16.
7. Contractors and subcontractors are not permitted to make payroll deductions which are contrary to state and federal law.

DAVIS-BACON REQUIREMENTS

Wages/Worker Classifications

All contractors and subcontractors must pay their workers no less than the hourly wages listed on federal wage determination for each classification of work performed on this project. In addition, if the applicable wage determination contains an hourly fringe benefit amount, the worker must receive benefits equal to that amount or a cash equivalent. All workers must be paid, in full, at least once a week. These requirements apply to salaried workers employed on this project engaged in physical or manual construction labor. It is the responsibility of the general contractor to clearly communicate all labor standards and Davis-Bacon requirements to all subcontractors employed on this project. All workers must be paid at an hourly rate for the type of work performed.

Only the classifications listed in the applicable wage determination or apprentices may be used on this project. Helpers or trainees may not perform work or services on this project. Laborers are not permitted to perform any skilled work which falls under the classification of another trade. For example, a laborer may not perform any electrical, carpentry, plumbing, sheet metal, etc. work on this project. If an employee performs more than one classification per week on this project, that employee should be listed twice showing the division of work on separate lines of the payroll.

All contractors and subcontractors having questions regarding the classification of workers shall direct their inquiries to the Grant Administrator.

Fringe Benefits

Contractors and subcontractors must submit documentation to the Grantee through the Grant Administrator to verify the type and the amounts paid into a bona fide fringe benefit program. The following are examples of bona fide fringe benefit plans:

- 1) Health, life, dental, vision or other similar insurance premiums paid by the employer;
- 2) Pension or retirement contributions *made by the employer* into a plan recognized by the Internal Revenue Service;
- 3) Expenses of certain recognized training programs;
- 4) Vacation and holiday pay may be considered as long as the employee would receive any unused amounts at termination of employment.

NOTE: Payroll deductions required by law (e.g., social security, worker's compensation, unemployment insurance, Federal/State/Local taxes, etc.) are not considered fringe benefits under Davis-Bacon law.

The following are NOT eligible bona fide fringe benefits:

- 1) Travel time;
- 2) Bonus payments;
- 3) Use of company tools or equipment;
- 4) Use of company vehicle;
- 5) Uniforms or safety shoes
- 6) Union Dues; Contributions into industry campaigns, marketing or advancement;
- 7) Substance Abuse Testing/Training programs

Independent subcontractors and self-employed owners are considered to be subcontractors of the Prime contractor. They are subject to the same requirements as are all subcontractors. Independent subcontractors and self-employed owners must submit a Certified Payroll Report or be listed on another contractors' weekly payroll following the documentation guidelines as referenced by DOL, WHD-347.

If the contractor or its subcontractors do not pay the proper hourly rate and fringe benefit on this project, the grantee shall withhold a necessary amount from the prime contractor until restitution is made. The prime contractor may be held liable for liquidated damages if its workers or those of subcontractors on this project are not paid the proper hourly wage and benefit.

Apprentices

Contractors and subcontractors may use and classify workers on this project as apprentices provided that the workers are duly registered and certified in a bona fide apprenticeship program recognized by the U.S. Department of Labor, Bureau of Apprenticeship and Training or State Approved Apprenticeship Program. If a contractor or subcontractor intends to utilize apprentices on this project, they must provide documentation to the Grant Administrator to verify the certification of the employee in an approved Apprenticeship Program. Certification must be provided before the apprentice is permitted to work on the job site. Contractors and subcontractors may not exceed the ratio of apprentices to journeymen as established by the apprenticeship program. Apprentices performing work on project site without proper ratio for supervision will be compensated at full journeymen wage complying with the Davis-Bacon Prevailing Wage classification. Contractors must also provide wage and fringe information for various levels of apprenticeship.

On-site Interviews

The Grant Administrator, a representative from the U. S. Department of Labor, a representative of the U. S. Department of Housing and Urban Development and a representative of OCRA shall be permitted to visit the job site and interview workers employed on this project. A Record of Employee Interviews must be maintained in the project file. Employee interviews are to be conducted in person any deviation will require written approval from OCRA or Grant Services per project.

SECTION 3

Section 3 of the Housing and Urban Development Act of 1968 provides that to the greatest extent feasible, contractors and subcontractors should make training and employment opportunities available to Section 3 Residents and Businesses when creating new positions to work on federally assisted projects. "Greatest Extent Feasible" means that contractors must make every effort to recruit, target and direct economic opportunities to Section 3 residents and businesses.

Section 3 residents include Low and Very Low-Income level persons. HUD sets the low-income limit at 80% and very low-income limit at 50% of the median family income for counties and metropolitan areas across the country. A Section 3 Business is one that is owned by Section 3 residents, employs Section 3 residents or subcontracts with businesses that provide opportunities to low and very low-income persons.

Prior to start of construction, the Civil Rights/Section 3 Officer must place Section 3 Posters, providing the type and location of the project, and contact information where Section 3 residents and businesses may request additional information regarding Section 3 opportunities at the nearest Work One Office, (find location and contact person at www.in.gov/dwd/WorkOne/). The 11 x 14 Posters may be sent to Work One via electronic mail if desired. Posters should also be placed in local government offices, Post Office, Library, public housing developments or such other public place that Section 3 residents may have the opportunity to observe the Posters.

The Civil Rights/Section 3 Officer must maintain a list of names and contact information of persons who express an interest in obtaining employment or subcontracts under Section 3 guidelines and provide that information to the prime contractor or any subcontractors working on the federally assisted project as jobs, training or subcontracting opportunities become available.

The prime contractor and any known subcontractors subject to Section 3 must provide a list of current employees to the Civil Rights/Section 3 Officer at the Pre-construction Conference. When the work called for in their contract is complete, each of these contractors and subcontractors are required to submit a Section 3 Compliance Report together with a list of employees at completion of their contract. The beginning list and ending list will be used to determine whether any new employees were hired during the performance of their contract.

The prime contractor and any subcontractors who work on the project must place the appropriate job vacancy on Indiana Career Connect (ICC) at www.indianacareerconnect.com/. In addition, all contractors and subcontractors will search ICC for candidates that meet the requirements of the position and contact the appropriate regional Work One contact person to coordinate with the regional provider to help fill open positions. When the vacant position is filled, it is the responsibility of the Civil Rights/Section 3 Officer and/or the contractor or subcontractor

to advise Indiana Career Connect that the position is no longer available. Contractors are required to give first consideration to any Section 3 residents or Businesses for new positions, training, or subcontracting opportunities. Section 3 residents or businesses are not guaranteed employment or contracting opportunities under Section 3. Section 3 residents must demonstrate that they meet the qualifications for new employment opportunities created as a result of the federally assisted project. Section 3 business concerns must submit evidence to the satisfaction of the party awarding the contract to demonstrate that they are responsible firms and have the ability to perform successfully under the terms and conditions of the proposed contract.

In all instances where new positions are being created, the contractor must document the results of any Section 3 residents contacted regarding the position and the results of that contact. To ensure compliance with this federal regulation, all contractors and subcontractors (whose contract amount exceeds \$100,000) must complete a Section 3 Compliance Report when work on the project called for in their contract is complete. Any documentation regarding contacts or consideration of Section 3 applicants must be maintained by the contractor and provided to the Civil Rights/Section 3 Officer with the Compliance Report.

BUY AMERICA PREFERENCE

The Build America Buy America Act provides, to the greatest extent possible, for early coordination with engineers/architects to incorporate products that meet Buy America Preference in the design phase of infrastructure projects.

All contractors who receive federal financial assistance for an infrastructure project which includes construction, alterations, or repairs are subject to the BABA unless a waiver is in place. The Buy America Preference (BAP) requires the use of iron and steel, construction materials and manufactured goods produced in the United States.

Bidders must provide cost estimates based on the most current American made products available. It is the responsibility of the grantee to ensure that BABA requirements are included in bid advertisements. *Form 17: Sample Invitation for Bid Publication* has been updated to reflect Buy America Preference requirements. The Buy America Preference must be included in all subawards, contracts, and purchase orders for the work performed, or products supplied under an OCRA award.

OTHER FEDERAL REQUIREMENTS

Title VI of the Civil Rights Act of 1964 states that no person shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance.

Title VII of the Civil Rights Act of 1964 prohibits discrimination in hiring, promotion and other employment practices on the basis of race, color, religion, sex, or national origin.

Section 109 of the Housing and Urban Development Act of 1974 prohibits discrimination on the basis of race, color, national origin, disability, age, religion and sex within Community Development Block Grant programs or activities.

Title III of the Americans with Disabilities Act prohibits discrimination based on "disability" by requiring that places of public accommodation be readily accessible to and useable by persons with disabilities.

The Architectural Barriers Act of 1968 requires that a project meet at least the minimum requirements of accessibility. A Certificate of Accessibility must be provided to the Grantee with a copy to OCRA on or before the completion of the project.

Section 504 of the Rehabilitation Act of 1974 states that a contractor or subcontractor may not discriminate against an otherwise qualified individual from participating in or enjoying the benefits of this project as a result of a physical handicap.

Executive Order 11063 provides that no person on the basis of race, color, religion, sex, or national origin, shall be discriminated against in federal housing assistance, including lending assistance.

Executive Order 11246 as amended by Executive Order 11375 provides that no person shall be discriminated against on the basis of race, color, religion, sex, or national origin in any phase of employment on federally assisted construction contracts.

All contractors and subcontractors **awarded a federal contract or subcontract in excess of \$50,000.00 and having more than 50 employees** must have an Affirmative Action Plan established in writing and on file in its place of business. Failure to have an Affirmative Action Program may result in sanctions established under section 209(a) of Executive Order 11246. This regulation is enforced by the Office of Federal Construction Contract Compliance, and additional information may be found at www.dol.gov/ofccp or at 1-800-397-6251. The Indiana office is located at 46 East Ohio Street, Suite 419, Indianapolis, Indiana 46204 and phone number is 317-226-5680.

Other laws enforced by the U. S. Equal Employment Opportunity Commission (EEOC) may be found at www.eeoc.gov/policy/laws.html.

OTHER RESPONSIBILITIES WHEN PARTICIPATING IN A FEDERALLY FUNDED PROJECT

- A) The State of Indiana has established a Minority/ Women Owned Business Enterprise goal of 10% and Veteran Owned Small Business goal of 3% of the grant amount. Documentation of reasonable efforts to meet this goal must be maintained in the grantee's project files.
- B) The contractor must display the following posters on the project job site in a location assessable to all employees. Posters may be obtained from the Grant Administrator.
- Equal Employment Opportunity is The Law
 - Fair Housing Poster
 - Safety and Health Protection on the Job
 - Notice to All Employees working on Federally Financed Construction Projects
 - Employee Polygraph Protection Act
- C) A copy of the applicable wage decision assigned to the project must also be posted at the job site.

RUNDELL ERNSTBERGER ASSOCIATES

Meeting Agenda

Meeting Date: August 2, 2024
Meeting Time: 11:00 am
Meeting Location: City Building, 127 N. Foote St., Cambridge City, IN 47327
Project Name: Fire Station Park

Items of Discussion: Pre-bid Meeting

A. Project Description

1. Project Name: Fire Station Park
2. Location: 127 W. Maple St., Cambridge City, IN 47327

B. Introductions

1. Owner: Town of Cambridge City
 - a. Owner's Representative: Jim McLane, Town Council President
2. Design Consultant: Rundell Ernstberger Associates (REA)
 - a. Cecil Penland, PLA - Project Manager | p: 317.263.0127 e: cpenland@reasite.com
3. Other consultants: Champlin Architecture, The Engineering Collaborative

C. Scope of Work

1. The Work of this Project is defined by the Contract Documents and includes, but is not limited to, Construction of park improvements to include: selective demolition of existing pavements; site excavation and grading; construction of new concrete, asphalt, and crushed stone pavements; construction of a shade structure/pavilion; construction of electrical improvements; and other Work indicated in the Contract Documents.

Project Timeline

2. Substantial Completion: May 16, 2025.

D. Bidding Procedure

1. Bid documents are available through Eastern Engineering, [Eastern Engineering Plan Room](#).
 - a. Pre-bid Meeting: Friday, August 2, 2024
 - b. Final Addendum Issued: Thursday, August 8, 2024
 - c. Bid Opening: Monday, August 12, 2024
2. All questions/requests for interpretation or clarification should be submitted in writing to REA no later than 12:00 pm EST, Wednesday, August 7, 2024.
3. Submit hardcopy bids in person to the Town of Cambridge City's Clerk's Office, 127 N. Foote St., Cambridge City, IN 47327 by 4:00 pm.
 - a. Bids will be publicly opened and read aloud at the Town Council meeting at 6:00 pm.

E. Bid Documents

1. Bid Form, Bid Form Supplements, Contractor's Bid for Public Work - Form 96
2. Project is partially funded through a grant provided by the Indiana Office of Community and Rural Affairs (OCRA)
 - a. Refer to Federal Construction Contract Provisions in Division 00 for OCRA requirements
 - b. Refer to Appendix for current wage scale

F. Schedule of Alternates

1. Alternate No. 1: Additional Hardscape & Lighting Improvements
2. Alternate No. 2: Seating Area
3. Alternate No. 3: Parking Area

G. Coordination

1. Do not block or disturb access to adjacent fire station.

H. Permitting

1. Construction Stormwater General Permit
 - a. Currently being worked on.

I. Questions

J. Adjournment

SECTION 32 9115 - SOIL PREPARATION

PART 1 - GENERAL

1.1 SUMMARY

- A. Section includes all labor, materials, tools, supplies, equipment, facilities, transportation and services necessary for, and incidental to performing all operations in connection with furnishing, delivery, and installation of Topsoil and Planting Soil and /or the modification of existing site soil for use as Planting Soil, complete as shown on the drawings and as specified herein. Work includes all testing, soil amendments, preparation of subgrade and subsoil, excavation, borrow material, placement, fine grading, as well as maintenance and clean up.
- B. Related Requirements:
 - 1. Section 32 9200 "Turf and Grasses" for placing planting soil for turf and grasses.
 - 2. Section 32 9300 "Plants" for placing planting soil for plantings.

1.2 DEFINITIONS

- A. Backfill: The earth used to replace or the act of replacing earth in an excavation. This can be amended or unamended soil as indicated.
- B. CEC: Cation exchange capacity.
- C. Compacted Soil: Soil where the density of the soil is greater than the threshold for root limiting, and further defined in this specification.
- D. Compost: The product resulting from the controlled biological decomposition of organic material that has been sanitized through the generation of heat and stabilized to the point that it is beneficial to plant growth.
- E. Finish Grade: The surface or elevation of Planting Soil after final grading and settlement.
- F. Imported Soil: Soil that is transported to Project site for use.
- G. Manufactured Soil: Soil produced by blending soils, sand, stabilized organic soil amendments, and other materials to produce planting soil.
- H. NAAPT: North American Proficiency Testing Program. An SSSA program to assist soil-, plant-, and water-testing laboratories through inter-laboratory sample exchanges and statistical evaluation of analytical data.
- I. Organic Matter: The total of organic materials in soil exclusive of un-decayed plant and animal tissues, their partial decomposition products, and the soil biomass; also called "humus" or "soil organic matter."
- J. Planting Soil: Existing, on-site soil; amended on-site soil; imported soil; or manufactured soil that has been modified as specified with soil amendments and perhaps fertilizers to

produce a soil mixture best for plant growth, including modifying soil chemistry, texture and drainage; and further defined in this specification.

- K. RCRA Metals: Hazardous metals identified by the EPA under the Resource Conservation and Recovery Act.
- L. SSSA: Soil Science Society of America.
- M. Subgrade: Surface or elevation of subsoil remaining after excavation is complete, or the top surface of a fill or backfill before planting soil is placed.
- N. Subsoil: Soil beneath the level of subgrade; soil beneath the topsoil layers of a naturally occurring soil profile, typified by less than 1 percent organic matter and few soil organisms.
- O. Topsoil: Naturally produced and harvested soil from the A horizon or upper layers or the soil as further defined in this specification.
- P. USCC: U.S. Composting Council.

1.3 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference at project site regarding the work, administrative procedures during construction and project work schedule.

1.4 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Include recommendations for application and use.
 - 2. Include test data substantiating that products comply with requirements.
 - 3. Include sieve analyses for aggregate materials.
 - 4. Material Certificates: For each type of of imported soil, soil amendment, and fertilizer before delivery to the site, according to the following:
 - a. Manufacturer's qualified testing agency's certified analysis of standard products.
 - b. Analysis of fertilizers, by a qualified testing agency, made according to AAPFCO methods for testing and labeling and according to AAPFCO's SUIP #25.
 - c. Analysis of nonstandard materials, by a qualified testing agency, made according to SSSA methods, where applicable.

1.5 INFORMATIONAL SUBMITTALS

- A. Qualification Data: For each testing agency.
- B. Preconstruction Test Reports: For preconstruction soil analyses specified in "Preconstruction Testing" Article.
- C. Field quality-control reports.

1.6 QUALITY ASSURANCE

- A. **Installer Qualifications:** The Contractor shall engage a qualified landscape subcontractor who has completed soil preparation work similar in material, design and extent to that indicated for this Project, with 5 years minimum experience in finish grading work, and with a record of successful landscape establishment. The Contractor shall require landscape subcontractor to maintain an experienced full-time supervisor on the Project site during times that soil preparation work and planting operations are in progress.
- B. **Testing Agency Qualifications:** The Testing Agency shall be an independent, laboratory recognized by the State Department of Agriculture; experienced in soil science, soil testing, and plant nutrition; with the experience and capability to conduct the testing indicated; and that specializes in types of tests to be performed.
1. **Laboratories:** Subject to compliance with requirements, provide testing by the following or approved equivalent:
 - a. A & L Great Lakes Laboratories, Inc.
 - b. 3505 Conestoga Drive, Fort Wayne, Indiana 46808. Phone (260) 483-4759.
 - c. Brookside Laboratories, Inc.
 - d. 200 White Mountain Drive, New Bremen, Ohio 45869. Phone (419) 977-2766
- C. **Soil Supplier:** The Soil Supplier shall be a firm that specializes in the production of mixes of planting soils with at least five years of experience in providing soil mixes to projects of similar size and scope to this Project.
1. **Supplier:** Subject to compliance with requirements, provide mixes from the following or acceptable equivalent:
 - a. Greendell Landscape Solutions (greendelllandscape.com)
 - 1) 749 West State Road 42, Mooresville, IN 46158. Phone (888) 237-7331
 - b. Soilmaker (www.soilmaker.com)
 - 1) 2000 South River Road, West Lafayette, IN 47906. Phone (765) 414-5788
 - c. McCarty Mulch & Stone (www.landscapemulch.com)
 - 1) 100 Bluffdale Drive, Greenwood, IN 46142. Phone (317) 807-6883

1.7 SOIL-SAMPLING REQUIREMENTS

- A. **General:** Each sample shall be typical of the lot of material to be furnished; provide an accurate representation of composition, color, and texture.
- B. **Sample Collection:** Samples shall be taken and labeled by Contractor or soil or state-certified, -licensed, or -registered soil scientist under the direction of the testing agency and/or the Agronomic / Soil Consultant.
1. Contact Agronomic / Soil Consultant prior to sampling for instructions on amount of sampling required.
 2. Collect composite samples for each bulk material according to requirements. Divide composite sample as follows and place in sealed containers.
 - a. Send (3) 1-quart samples to the testing agency.
 3. Label each sample with the content, source, date obtained, location keyed to a site plan or other location system, and sampling depth.

1.8 TESTING REQUIREMENTS

- A. General: Perform tests on soil samples according to requirements in this article.
- B. Physical Testing:
1. Soil Texture: Soil-particle, size-distribution analysis by the following methods according to SSSA's "Methods of Soil Analysis - Part 1-Physical and Mineralogical Methods":
 - a. Hydrometer Method: Report percentages of sand, silt, and clay.
 2. Total Porosity: Calculate using particle density and bulk density according to SSSA's "Methods of Soil Analysis - Part 1-Physical and Mineralogical Methods."
 3. Water Retention: According to SSSA's "Methods of Soil Analysis - Part 1-Physical and Mineralogical Methods."
 4. Saturated Hydraulic Conductivity: According to SSSA's "Methods of Soil Analysis - Part 1-Physical and Mineralogical Methods"; at 85% compaction according to ASTM D 698 (Standard Proctor).
- C. Chemical Testing:
1. CEC: Analysis by sodium saturation at pH 7 according to SSSA's "Methods of Soil Analysis - Part 3- Chemical Methods."
 2. Clay Mineralogy: Analysis and estimated percentage of expandable clay minerals using CEC by ammonium saturation at pH 7 according to SSSA's "Methods of Soil Analysis - Part 1- Physical and Mineralogical Methods."
 3. Metals Hazardous to Human Health: Test for presence and quantities of RCRA metals including aluminum, arsenic, barium, copper, cadmium, chromium, cobalt, lead, lithium, and vanadium. If RCRA metals are present, include recommendations for corrective action.
 4. Phytotoxicity: Test for plant-available concentrations of phytotoxic minerals including aluminum, arsenic, barium, cadmium, chlorides, chromium, cobalt, copper, lead, lithium, mercury, nickel, selenium, silver, sodium, strontium, tin, titanium, vanadium, and zinc.
- D. Fertility Testing: Soil-fertility analysis according to standard laboratory protocol of SSSA NAFT, including the following:
1. Percentage of organic matter.
 2. CEC, calcium percent of CEC, and magnesium percent of CEC.
 3. Soil reaction (acidity/alkalinity pH value).
 4. Buffered acidity or alkalinity.
 5. Nitrogen ppm.
 6. Phosphorous ppm.
 7. Potassium ppm.
 8. Manganese ppm.
 9. Manganese-availability ppm.
 10. Zinc ppm.
 11. Zinc availability ppm.
 12. Copper ppm.
 13. Sodium ppm and sodium absorption ratio.
 14. Soluble-salts ppm.

15. Presence and quantities of problem materials including salts and metals cited in the Standard protocol. If such problem materials are present, provide additional recommendations for corrective action.
 16. Other deleterious materials, including their characteristics and content of each.
- E. Organic-Matter Content: Analysis using loss-by-ignition method according to SSSA's "Methods of Soil Analysis - Part 3- Chemical Methods."
- F. Recommendations: Based on the test results, state recommendations for soil treatments and soil amendments to be incorporated to produce satisfactory planting soil suitable for healthy, viable plants indicated. Include, at a minimum, recommendations for nitrogen, phosphorous, and potassium fertilization, and for micronutrients.
1. Fertilizers and Soil Amendment Rates: State recommendations in weight per 1000 sq. ft. for 6-inch depth of soil.
 2. Soil Reaction: State the recommended liming rates for raising pH or sulfur for lowering pH according to the buffered acidity or buffered alkalinity in weight per 1000 sq. ft. for 6-inch depth of soil.

1.9 APPROVAL OF PLANTING SOILS.

- A. If tests show that soils fail to meet the specifications, obtain other sources of material, retest and resubmit until accepted by the Landscape Architect.
1. Planting Soil that does not meet the specification will be rejected. The Contractor shall remove, legally dispose of off-site and replace with suitable soil at no additional cost to owner.

1.10 DELIVERY, STORAGE, AND HANDLING

- A. Packaged Materials:
1. Deliver packaged materials in original, unopened containers showing weight, certified analysis, name and address of manufacturer, and compliance with state and Federal laws if applicable.
 2. Biological and chemical additives shall be protected from extreme humidity, cold, or heat. All products shall be freshly manufactured and dated for the year in which the products are to be used.
 3. Deliver all chemical amendments in original, unopened containers with original labels intact and legible, which state the guaranteed chemical analysis. Store all chemicals in a weather protected enclosure.
- B. Bulk Materials:
1. Coordinate delivery of bulk materials to allow for timely placing and spreading in destination locations as specified.
 2. If stockpiling is necessary, place materials in approved locations as directed by the Owner and Landscape Architect.
 - a. Maintain stockpiles in a manner required to prevent unnecessary loss due to erosion from wind or rain. Protect soil and soil stockpiles, including the stockpiles at the soil blender's yard, from wind, rain and washing that can erode soil or separate fines and coarse material, and contamination by chemicals, dust and debris that may be detrimental to plants or soil drainage. Cover stockpiles with plastic sheeting or fabric at the end of each workday.
 - b. In no case shall stockpiles remain in excess of 14 days.

- c. Following the completion of all soil placement, immediately remove from the site all excess materials.
- d. Return stockpile area to original condition, at no additional cost to the Owner.
3. Do not dump or store bulk materials near structures, utilities, walkways and pavements, or on existing turf areas or plants.
4. Provide erosion-control measures to prevent erosion or displacement of bulk materials, discharge of soil-bearing water runoff, and airborne dust reaching adjacent properties, water conveyance systems, or walkways.
5. Do not move or handle materials when they are wet or frozen.
6. Accompany each delivery of bulk fertilizers and soil amendments with appropriate certificates.

1.11 PROJECT CONDITIONS

- A. Utilities: Determine location of above grade and underground utilities and perform work in a manner which will avoid damage. Hand-excavate, as required. Contractor shall be responsible for damages and repairs as a result of failure to locate utilities.

PART 2 - PRODUCTS

2.1 SOILS

A. TOPSOIL

1. Topsoil Source: Import topsoil from off-site local sources. Obtain topsoil from naturally well-drained local or regional sites, where topsoil occurs at least 4 inches deep; topsoil shall not be obtained from bogs or marshes; and that do not contain undesirable organisms; disease-causing plant pathogens; or obnoxious weeds and invasive plants. Provide source information for topsoil as required in this specification. Source area for topsoil shall not have been under active cultivation for a period of 5 years minimum or from a commercial processing facility specializing in production of sands, gravels and stones.
2. Topsoil shall be natural, fertile, friable, and pervious soil. Topsoil shall be black or a darker shade of brown than underlying subsoil and clean and free of stones 1 inch or larger in any dimension, roots, plants, sods, clay lumps, brush, weeds and other extraneous materials harmful to plant growth. Topsoil shall not be pulverized. Topsoil shall comply with ASTM D 5268.
3. Topsoil shall meet the following composition.

Mechanical Analysis:	Loam or Sandy Loam
pH Range:	6.0-7.0
Organic Matter Content:	Minimum 2% and maximum 15%
Chemical Analysis:	Magnesium: 100-250 ppm and 10-15% base saturation
	Phosphorus: P1 (weak Bray) 20-30 ppm
	P2 (strong Bray) 40-60 ppm
	Potassium: 175-250 ppm and 5-20% base saturation
	Calcium: 1600 ppm and 65-75% base saturation
	Soluble Salts: Shall not exceed .75 mmhos/cm
4. Topsoil will be considered defective if it does not pass tests. Contractor shall amend defective topsoil at no additional cost to the Owner.

B. PLANTING SOIL

1. Imported approved topsoil that has been modified with specified soil amendments and fertilizers to produce a soil mixture best for plant growth. Amend topsoil as follows:
 - a. Ratio of Loose Compost to Soil: 1:4 by volume.
 - b. Ratio of Loose Sphagnum Peat to Soil: as recommended by analysis.
 - c. Weight/Volume of inorganic soil amendments: as recommended by analysis.
 - d. Weight/Volume of fertilizers: as recommended by analysis.
2. Blend approved topsoil with compost and amendments as recommended by analysis to create Planting Soil.

2.2 INORGANIC SOIL AMENDMENTS

- A. Lime: ASTM C 602, agricultural liming material containing a minimum of 80 percent calcium carbonate equivalent and as follows:
 1. Class: T, with a minimum of 99 percent passing through a No. 8 sieve and a minimum of 75 percent passing through a No. 60 sieve.
 2. Form: Provide lime in form of ground dolomitic limestone.
- B. Sulfur: Granular, biodegradable, and containing a minimum of 90 percent elemental sulfur, with a minimum of 99 percent passing through a No. 6 sieve and a maximum of 10 percent passing through a No. 40 sieve.
- C. Iron Sulfate: Granulated ferrous sulfate containing a minimum of 20 percent iron and 10 percent sulfur.
- D. Perlite: Horticultural perlite, soil amendment grade.
- E. Agricultural Gypsum: Minimum 90 percent calcium sulfate, finely ground with 90 percent passing through a No. 50 sieve.
- F. Sand: Clean, washed, natural or manufactured, free of toxic materials, and according to ASTM C 33/C 33M.

2.3 ORGANIC SOIL AMENDMENTS

- A. Compost: Well-composted, stable, and weed-free organic matter produced by composting feedstock, and bearing USCC's "Seal of Testing Assurance," and as follows:
 1. Feedstock: food, or biosolids; or source-separated or compostable mixed solid waste.
 2. Reaction: pH of 5.5 to 8.
 3. Soluble-Salt Concentration: Less than 5 dS/m.
 4. Moisture Content: 35 to 55 percent by weight.
 5. Organic-Matter Content: 50 to 60 percent of dry weight.
 6. Particle Size: Minimum of 98 percent passing through a 3/4-inch sieve.
- B. Sphagnum Peat: Partially decomposed sphagnum peat moss, finely divided or of granular texture with 100 percent passing through a 1-inch sieve, a pH of 3.4 to 4.8, and a soluble-salt content measured by electrical conductivity of maximum 5 dS/m.

2.4 FERTILIZERS

- A. Slow-Release Fertilizer: Granular or pelleted fertilizer consisting of 50 percent water-insoluble nitrogen, phosphorus, and potassium in the following composition:
 - 1. Composition: Nitrogen, phosphorous, and potassium in amounts recommended in soil reports from a qualified testing agency.

PART 3 - EXECUTION

3.1 SITE CONDITIONS

- A. It is the responsibility of the Contractor to be aware of all surface and subsurface conditions and examine areas to receive Planting Soil for compliance with requirements. The Contractor shall notify the Landscape Architect, in writing, of any potential conditions which might prevent satisfactory completion. Do not proceed with work until unsatisfactory conditions have been corrected.
- B. Excavation, subgrade preparation, grading and soil placement shall not be done when soil is frozen or when at or above field capacity.
- C. Utilities: Determine location of above grade and underground utilities and irrigation lines and perform work in a manner which will avoid damage. Hand-excavate, as required. Contractor shall be responsible for damages and repairs as a result of failure to locate utilities. Maintain grade stakes until the Engineer agrees upon removal. The Contractor shall notify the Landscape Architect, in writing, of any potential conflicts or necessary relocations.
- D. Coordination and Scheduling: Coordinate with all other trades operations necessary to remove unsuitable soils, to excavate soils, to deliver and stockpile as necessary, and place Planting Soil as specified.
- E. Where existing trees and plant material are to be protected in place, excavation, subsoil preparation and Planting Soil placement shall be limited to comply with Section 01 56 39 "Temporary Tree and Plant Protection".
- F. Contractor shall test soils and subsoils for the level of compaction and modify according to requirements.
 - 1. The following parameters shall define the general description of the threshold points of soil compaction in existing, modified or installed soil and subsoil.
 - a. Acceptable Compaction: Good rooting anticipated, but increasing settlement expected as compaction is reduced and/or in soil with a high organic matter content.
 - 1) Standard Proctor Method: 75 to 85 percent.
 - 2) Penetration Resistance Method: 75 to 250 psi.
 - b. Root limiting Compaction: Root growth is limited with fewer, shorter and slower growing roots.
 - 1) Standard Proctor Method: 85 to 90 percent.
 - 2) Penetration Resistance Method: Approx. 300 psi.
 - c. Excessive Compaction: Roots not likely to grow but can penetrate soil when soil is above field capacity.
 - 1) Standard Proctor Method: Above 90 percent.

2) Penetration Resistance Method: Above 400 psi.

3.2 SUBSOIL PREPARATION

- A. Contractor shall scarify the surface of the subsoil according to the following requirements.
- B. Subsoil with Acceptable Compaction
 - 1. Scarify the surface of the subsoil with Tilling. Utilize a rotary line tiller, roto tiller, or spade tiller to loosen soil surface to depths of 6 inches. Remove stones larger than 1-1/2 inches in any dimension and sticks, roots, rubbish, and other extraneous matter and legally dispose of them off Owner's property
- C. Subsoil with Root Limiting or Excessive Compaction
 - 1. Sites Larger than ¼ Acre
 - a. Scarify the surface of the subsoil with Soil Ripping. Utilize a tracked dozer or similar large grading equipment to loosen the soil by dragging a ripping shank or chisel thru the soil to depths of 24 inches with ripping shanks spaced 18 inches or less apart in two directions.
 - 2. Sites Smaller than ¼ Acre:
 - a. Scarify the surface of the subsoil with Soil Fracturing. Loosen the soil to depths of 18 to 24 inches, using a backhoe to dig into the soil. Lift and then drop the loosened soil immediately back into the hole. Move the bucket to the adjacent soil and repeat the process until the entire area indicated has been loosened.
 - 3. Small Sites and Areas with Limited Equipment Access
 - a. Scarify the surface of the subsoil with Soil Trenching. Utilize a chain trenching machine to dig 24 inch deep trenches, 24 inches apart across the entire area. Maintain an 18-inch standoff from the edges of all curbs, paving and structures.

3.3 PLACING AND MIXING SOIL - GENERAL

- A. Site Examination: Prior to installation of Soil, examine site to confirm that conditions of the subgrade and subsoil preparation are satisfactory for the work of this section to proceed. Verify that the work has been approved by the Landscape Architect. If unsatisfactory conditions are encountered, notify the Landscape Architect immediately to determine corrective action before proceeding.
- B. Site conditions to examine include, but are not limited, to the following:
 - 1. Subgrade set at proper elevation. Excavate and fill where necessary to bring subsoil to required levels, profiles and contours.
 - 2. All areas to be filled with Soil are free of construction debris, refuse, compressible or biodegradable materials, stones greater than 2 inches diameter, soil crusting films of silt or clay that reduces or stops drainage from the Soil into the subsoil; and/or standing water. Remove unsuitable material from the site.
 - 3. Subgrade scarified according to requirements.
 - 4. No adverse drainage conditions are present.
 - 5. No conditions are present which are detrimental to plant growth.
 - 6. Utility work has been completed per the drawings.

7. No foreign or deleterious material or liquid such as paint, paint washout, concrete slurry, concrete layers or chunks, cement, plaster, building debris, oils, gasoline, diesel fuel, paint thinner, turpentine, tar, roofing compound, acid, has been deposited in Soil.

C. Construction Sequencing Notes:

1. Phase work such that equipment to deliver or grade soil does not have to operate over previously installed Soil.
2. Where travel over installed soil is unavoidable, limit paths of traffic to reduce the impact of compaction in Soil.
3. Where possible place large trees first and fill Soil around the root ball.
4. Repeat scarification of subsoil where equipment for hauling and spreading Soil has compacted subsoil.

3.4 PLACING TOPSOIL OVER EXPOSED SUBGRADE

A. Subgrade Preparation / Transition Zone:

1. Prepare subsoil according to requirements.
2. Apply, add soil amendments, and mix 4 inch depth of topsoil over prepared, loosened subgrade according to "Mixing" Paragraph below. Mix thoroughly into top 4 inches of subgrade. Spread remainder of topsoil.

B. Mixing: Spread unamended topsoil to total depth of 4 inches, but not less than required to meet finish grades after mixing with amendments and natural settlement.

1. Amendments: Apply soil amendments per Soil Analysis.
 - a. Mix lime and sulfur, if required with dry soil before mixing fertilizer.
 - b. Mix fertilizer with topsoil no more than seven days before planting.
2. Lifts: Apply and mix unamended soil and amendments in lifts not exceeding 8 inches in loose depth for material compacted by compaction equipment, and not more than 4 inches in loose depth for material compacted by hand-operated tampers.

C. Compaction: Compact each blended lift of Topsoil to 75 to 82 percent of maximum Standard Proctor density according to ASTM D 698, except where a different compaction value is indicated on Drawings.

D. Finish Grading: According to requirements.

3.5 PLACING MANUFACTURED PLANTING SOIL OVER EXPOSED SUBGRADE

A. General: Apply manufactured soil on-site in its final, blended condition. Do not apply materials or till if Planting Soil, existing soil or subgrade is frozen, muddy, or excessively wet.

1. Subgrade Preparation / Transition Zone:
2. Prepare subsoil according to requirements.
3. Apply 4-inch depth of manufactured Planting Soil over prepared, loosened subgrade. Mix thoroughly into top 4 inches of subgrade. Spread remainder of planting soil.

B. Application: Spread manufactured Planting Soil to total depth indicated in plans but not less than required to meet finish grades after natural settlement.

1. Lifts: Apply Planting Soil in lifts not exceeding 8 inches in loose depth for material compacted by compaction equipment, and not more than 4 inches in loose depth for material compacted by hand-operated tampers.
- C. Compaction: Compact each blended lift of Planting Soil to 75 to 82 percent of maximum Standard Proctor density according to ASTM D 698, except where a different compaction value is indicated on Drawings.
- D. Finish Grading: According to requirements.

3.6 FINISH GRADING

- A. General:
 1. Grade planting soil to a smooth, uniform surface plane with loose, uniformly fine texture. Roll and rake, remove ridges, and fill depressions to meet finish grades.
 2. Grade to uniform levels or slopes between points where elevations are indicated or between such points and existing grades as indicated on Grading Plans.
 3. Limit fine grading to areas that can be planted in the immediate future.
- B. Finish grade elevations:
 1. Set all finish grades of soil to allow for settling.
 - a. Turf (sod): Finish grade of sodded areas shall remain lower to accommodate the thickness of the sod.
 - b. Planting Beds: Finish grade of planting beds shall remain lower to accommodate the thickness of bark or stone mulch as indicated on drawings.
 - c. Adjacent to Paved Surfaces: Finish grade shall be held below adjacent paved surfaces as indicated on drawings.

3.7 FIELD QUALITY CONTROL

- A. Contractor shall engage a qualified testing agency to perform tests and inspections during construction to confirm that all soils provided meet requirements.
- B. Collect samples and conduct soil testing of each Planting Soil as outlined below.
 1. Provide one, well-mixed sample of each type of Planting Soil listed in Part 2 for every 300 cubic yards of Planting Soil placed.
 - a. Each composite sample shall be made up of min. 10 cores taken from random samples throughout the 300 cubic yards.
- C. Compaction: Test planting-soil compaction after placing each lift and at completion using a densitometer or soil-compaction meter calibrated to a reference test value based on laboratory testing according to ASTM D 698. Space tests at no less than one for each 1000 sq. ft. of in-place soil or part thereof.
- D. Soil will be considered defective if it does not pass tests. The Contractor shall remove, legally dispose of off-site and replace with suitable soil at no additional cost to owner.
- E. Prepare test reports.

- F. Label each sample and test report with the date, location keyed to a site plan or other location system, visible conditions when and where sample was taken, and sampling depth.

3.8 PROTECTION

- A. Protect installed and/or modified Planting Soil from damage including contamination and over compaction due to other soil installation, planting operations, and operations by other Contractors or trespassers.
 - 1. Prohibit the following practices within these areas except as required to perform planting operations:
 - a. Storage of construction materials, debris, or excavated material.
 - b. Parking vehicles or equipment.
 - c. Vehicle traffic.
 - d. Foot traffic.
 - e. Erection of sheds or structures.
 - f. Impoundment of water.
 - g. Excavation or other digging unless otherwise indicated.
 - 2. Maintain protection during installation until acceptance.
- B. If planting soil or subgrade is over-compacted, disturbed, or contaminated by foreign or deleterious materials or liquids, remove the planting soil and contamination; restore the subgrade as directed by Landscape Architect and replace contaminated planting soil with new planting soil.
- C. Protect all other work and materials from damage due to earthwork operations, operations by other contractors and trades and trespassers. Correct damage at no additional cost.
- D. Protect adjacent walls, walks and utilities from damage or staining by the soil. Use 1/2 inch plywood and or plastic sheeting as directed to cover existing concrete, metal and masonry work and other items as directed during the progress of the work.
- E. Provide temporary erosion control as needed to stop soil erosion until the site is stabilized with mulch, plantings, or turf.

3.9 CLEANING

- A. Protect areas adjacent to planting-soil preparation and placement areas from contamination. Keep adjacent paving and construction clean and work area in an orderly condition. Promptly remove soil from paved areas. Clean wheels of vehicles before leaving the site to avoid tracking soil onto roads, walks, or other paved areas.
- B. Remove surplus soil and waste material including excess subsoil, unsuitable materials, trash, and debris and legally dispose of them off Owner's property unless otherwise indicated.
 - 1. Dispose of excess subsoil and unsuitable materials on-site where directed by Owner.

END OF SECTION 32 9115

Superseded General Decision Number: IN20230006

State: Indiana

Construction Types: Heavy and Highway

Counties: Adams, Allen, Bartholomew, Benton, Blackford, Boone, Brown, Carroll, Cass, Clark, Clay, Clinton, Crawford, Daviess, Dearborn, Decatur, DeKalb, Delaware, Dubois, Elkhart, Fayette, Floyd, Fountain, Franklin, Fulton, Gibson, Grant, Greene, Hamilton, Hancock, Harrison, Hendricks, Henry, Howard, Huntington, Jackson, Jasper, Jay, Jefferson, Jennings, Johnson, Knox, Kosciusko, Lagrange, Lawrence, Madison, Marion, Marshall, Martin, Miami, Monroe, Montgomery, Morgan, Newton, Noble, Ohio, Orange, Owen, Parke, Perry, Pike, Posey, Pulaski, Putnam, Randolph, Ripley, Rush, Scott, Shelby, Spencer, Starke, Steuben, Sullivan, Switzerland, Tippecanoe, Tipton, Union, Vanderburgh, Vermillion, Vigo, Wabash, Warren, Warrick, Washington, Wayne, Wells, White and Whitley Counties in Indiana.

* EXCEPT LAKE, LAPORTE, PORTER AND ST. JOSEPH COUNTIES HEAVY AND HIGHWAY CONSTRUCTION PROJECTS

Note: Contracts subject to the Davis-Bacon Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026 or Executive Order 13658. Please note that these Executive Orders apply to covered contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but do not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(1).

If the contract is entered into on or after January 30, 2022, or the contract is renewed or extended (e.g., an option is exercised) on or after January 30, 2022:	. Executive Order 14026 generally applies to the contract. . The contractor must pay all covered workers at least \$17.20 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in 2024.
If the contract was awarded on or between January 1, 2015 and January 29, 2022, and the contract is not renewed or extended on or after January 30, 2022:	. Executive Order 13658 generally applies to the contract. . The contractor must pay all covered workers at least \$12.90 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on that contract in 2024.

The applicable Executive Order minimum wage rate will be adjusted annually. If this contract is covered by one of the

Executive Orders and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must still submit a conformance request.

Additional information on contractor requirements and worker protections under the Executive Orders is available at <http://www.dol.gov/whd/govcontracts>.

POWER EQUIPMENT OPERATOR CLASSIFICATIONS

GROUP 1: Air compressors in manifold with throttle valve; Asphalt plant engineer; Auto grade or similar type machine; Auto patrol; Backhoe or farm-type tractor, 45 hp and over; Ballast regulator (RR); Bituminous mixer; Bituminous paver; Bituminous plant engineer; Bulldozer; Caisson drilling machine; Cherry picker, 15 ton or over; Chip spreader; Concrete mixer 21 cu. ft. or over; Core drilling machine; Crane or derrick with any attachment (including clamshell, dragline, shovel, backhoe, etc.); Dredge engineer; Dredge

operator; Drilling machine on which the drill is an integral part; Earth mover, rubber-tired (paddle wheel, 616, 631, TS-24 or similar type); Earth mover, rubber-tired, tandem (\$0.50 per hour additional for each bowl); Elevating grader; Fork lift, 10 ton or over; P.C.C. formless paver post driver; Highlift shovel, 1 1/2 cu. yd. or over; Hoist, 2 drums and over; Helicopter, crew; Hydraulic boom truck; keystone, skimmer scoop; Loader, self-propelled (belt, chain, wheel); Locomotive operator; Mechanic; Mucking machine; Panel board concrete plant, central mix type; Paver, Hetherington; Pile driver, skid or crawler; Road paving mixer; Rock breaking plant; Rock crushing plant, portable; Roller (asphalt, waterbound macadam, bituminous macadam, brick surface); Roller with dozer blade; Root rake, tractor-mounted; Self-propelled widener; Stump remover, tractor-mounted; Surface heater and planer; Tandem push tractor (\$0.50 per hour additional); Tractor, boom; Winch or hoe head; Tractor, push; Tractor with scoop; Tractor-mounted spreader; Tree mover; Trench machine, over 24"; Tug boat operator; Well drilling machine; Winch truck with A-frame

GROUP 2: Air compressor with throttle valve or clever brooks-type combination; Backfiller; Backhoe on farm-type tractor, under 45 hp; Bull float; Cherry picker under 15 ton; Chip spreader, self-propelled; Concrete pump; Concrete mesh depressor, independently operated; Concrete spreader, power-driven; End loader under 1 1/2 cu. yd.; Excavating loader, portable; Finishing machine and bull float; Gunite machine; Head greaser; Mesh or steel placer; Multiple tamping machine (RR); P.C.C. concrete belt placer; Pull grader, power control; Refrigerating machine, freezing operation; Ross carrier; Sheepfoot roller (self-propelled); Tamper (multiple vibrating, asphalt, waterbound macadam, bituminous macadam, brick surface); Trench machine, 24" and under; Tube float; Welder

GROUP 3: Assistant plant engineer; Base paver (Jersey or similar type machine); Concrete finishing machine; Concrete mixer, less than 21 cu. ft.; Curb machine; Farm tractor, including farm tractor with all attachments except backhoe and including high lift end loaders of 1 cu. yd. capacity or less; Fire tender on boiler; Hoist, 1 drum; Operator, 5 pieces of minor equipment; Paving breaker; Power broom, self-propelled; Roller, earth and sub-base material; Slurry seal machine; Spike machine (RR); Tamper (multiple vibrating, earth and sub-base material); Throttle valve and fire tender combination on horizontal or upright boiler; Tractaire with drill; Tractor, 50 h.p. or over; Well point system; Widener, APSCO or similar type

GROUP 4: Air compressor; Assistant to engineer, oiler; Automatic dry batch plant; Bituminous distributor; Bituminous patching tamper; Belt spreader; Broom and belt machine; Chair cart, self-propelled; Coleman-type screen; Conveyor, portable; Digger post hole, power-driven; Fork lift, under 10 ton; Form grader; Form tamper, motor-driven; Generator; Hetherington driver; Hydra seeder; Operator, 1 through 4 pieces of minor equipment; Outboard or inboard motor boat; Power curing spraying machine; Power saw, concrete, power-driven; Pug mill; Pull broom, power-type; Seaman tiller; Straw blower or brush mulcher; Striping machine paint, motor-driven; Sub grader; Tractaire, tractor, below 50 h.p.; Truck crane oiler, driver; Spreader; Water pump; Welding machine, 2 of 300 amps or over

GROUP C.....	\$ 39.92	19.10

POWER EQUIPMENT OPERATOR CLASSIFICATIONS

GROUP A: Air compressor in manifold with throttle valve; Asphalt plant engineer; Auto grade or similar type machine; Bituminous mixer; Bituminous paver; Bituminous plant engineer; Bulldozer; Caisson drilling machine; Cherry picker, all; Ballast regulator (RR); Chip spreader, self-propelled; Cold grinder or similar type equipment; Concrete mixer, 21 cu. ft. or over; Concrete pump, truck-mounted; Core drilling machine; Crane or derrick with any attachment (including clamshell, dragline, shovel, backhoe, etc.); Dredge operator; Drilling machine on which the drill is an integral part; Earth mover, rubber-tired, tandem 0.50 per hour additional; Elevating grader; Endloader, Hi- lift shovel; P.C.C. formless paver; Gradall; Gravel processing plant, portable; Guardrail post driver operator; Head greaser; Hi-lift shovel, endloader; Hoist (2 drums and over); Helicopter crew; Hydraulic boom truck, Keystone, Skimmer Scoop; Loader, self-propelled (belt, chain wheel); Locomotive operator; Mechanic; Mucking machine; Multi-bank drill operator; Panel board concrete plant, central mix type; Paver, Hetherington; Pile driver, skid or crawler; Road paving mixer; Rock breaking plant; Rock crushing plant, portable; Roller (asphalt, waterbound, macadam, bituminous macadam, brick surface); Roller, with dozer blade; Root rake, tractor-mounted; Stump remover, tractor-mounted; Surface heater and planer; Tandem push tractor, \$0.50 per hour additional; Tractor, boom winch or hoe head; Tractor, push; Tractor with scoop; Tractor-mounted spreader; Tree mover; Trench machine, over 24"; Tug boat operator; Welder; Well drilling machine; Self-propelled widener.

GROUP B: Air compressor with throttle valve or clever brooks-type combination; Backfiller, base paver, Jersey or similar type machine; Bull float; Concrete finishing machine; Concrete mesh depressor, independently operated; Concrete spreader, power- driven; Dredge engineer; Excavator loader, portable; Fire tender on boiler; Forklift, regardless of ton; Hoists, 1 drum; Mesh or steel placer; Minor equipment operator, 5 pieces; Multiple tamping machine (RR); P.C.C. concrete placer; Paving

breaker; Power broom, self-propelled; Pull grader, power-controlled; Refrigerating machine, freezing operation; Roller, earth and sub- base material; Ross carrier (Straddle buggy); Sheepfoot roller, self-propelled without blade; Tamper, multiple\ vibrating (asphalt, waterbound macadam, bituminous macadam, brick surface); Tamper, multiple vibrating (earth and sub-base material); Trench machine, 24"" and under; Tube float; Well point system; Widener, Apsco or similar type; Winch truck with A-frame.

GROUP C: Air compressor, oiler; Automatic dry batch plant; Bituminous distributor; Bituminous patching tamper; Belt spreader; Broom and belt machine; Brush burner; Chair cart, self- propelled; Coleman-type screen; Cold grinder oiler; Concrete mixer, less than 21 cu. ft.; Conveyor, portable; Curb machine; Deckhand; Digger (post hole, power-driven); Farm tractor, including farm tractor with all attachments (except backhoe, Hi- lift endloaders); Form grader; Form tamper, motor-driven; Generator; Guniting machine; Hetherington driver; Hydra seeder; Mechanical heater; Minor equipment operator, 1 through 4 pieces; Curing spraying machine; Power saw, concrete (power-driven); Pug mill pull broom, power type; Seaman tiller; Slurry seal machine; Spike machine; Straw blower or brush mulcher; Stripping machine (paint, motor-driven); Sub grader; Throttle valve; Tractaire with drill; Truck crane and multi-drill oiler, driver; Spreader; Water pump.

GROUP 1: Air Compressor Over 600 CU FT, Air Compressors (2), Compressors hooked in Manifold, Asphalt Plant Engineer, Auto Grade and/or C.M.I. or similar type Machine, Auto Patrol, Motor Patrol, Power Blade, Aspco Paver, Asphalt Planer, Asphalt Rollers, Asphalt Paver Operator, Concrete or Asphalt Milling Machine, Self Propelled Widener, Backhoe and/or Pavement Breaker Attachment, Self Propelled Pavement Breaker, Ballast Regulator (R.R), Bituminous Mixer, Bituminous Paver, Bituminous Plant Engineer, Bulk Cement Plant Engineer, Bulldozer, One Drum Hoist with Tower or Boom, Cableways, Tower Machines, Back Filler, Boom Tractor, Boom or Winch Truck, Winch or Hydraulic Boom Truck, Boring Machine, Bolier Operator, Brush Mulcher, Bull Float, Finishing Machine, Power Cranes, Overhead Cranes, Truck cranes, Piledriver, Skid or Crawler, Guard Rail Post Driver, Tower Cranes, Hydro Crane, Cherry Picker, Draglines, Derricks, Shovels, Clam, Gradalls, Two Drum Machine, Concrete or Asphalt Curb Machine, Self Propelled, Concrete Mixers with Skid, Tournamixer, Concrete Pump (Truck or Skid Mounted), Concrete Plant Engineer, Soil Cement Machine, Formless Paver, Concrete Spreader, Span Saw (and similar types), Chip Spreader, Mesh Placer, Dredging Equipment or Dredge Engineer or Dredge Operator, Tug Boat Operator, Marine Scoops, Ditching Machine with Dual Attachment, Standard or Dinkey Locomotives, Drilling Machine, including Well Testing, Caissons, Shaft or any similar type Drilling Machine (Well Point Systems), 4 Point

Life System (Power Lift or similar type), Mud Cat, Mucking Machine, Sull-Air, Mechanics, Welder, Head Equipment Greaser, Tournapull, Tractor Operating Scoops, Push Tractors, Large Rollers on Earth, Loaders (Track or Rubber Mounted), or similar type Machine, Lull, Tournadozer, Scoopmobiles, Elevating Machines, Power Broom (Self Propelled), Power Sub Grader, Hydra Ax, Farm Tractor with Attachments, Soil Stabilizer (Seaman Tiller, Bo mag, Rago Gator and similar types of equipment), Tree Mover, Stump Remover, Root Rake, Hydra Seeder, Straw Blower, Refrigerating Machine, Freezing Operator, Chair Cart-Self Propelled, Helicopter Crew (3), Ross Carrier or Straddle Buggy or similar Machine, Rock Crusher Plant, Gravel Processing Machine, Pipe Cleaning Machine, Pipe Wrapping Machine, Pipe Bending Machine, Pug Mill, Concrete Bump Grinder Machine, Power Curing Spray Machine, Forklift (except when used for landscaping), Snooper Truck Operator.

GROUP 2: Air Compressor 600 cu. ft. and under, Air Tugger, Air Valves, Assistant Concrete Plant Engineer, Assistant Asphalt Plant Engineer, Asphalt Plant Fireman, Bulk Cement Plant Equipment Greaser, Concrete Mixers without Skips, Curbing Machine, Concrete Saw (Self Propelled), Conveyors, Cement Blimps, Ditching Machine under 6", Distributor Operator On trucks, Deck Hands, Elevators when used for hoisting material, Engine Tenders, Fork Lift (when used for landscaping), Farm Tractor, Fireman, Fireman on Paint or Dope Pots, Form Tamper, Form Grader, Flex Plane, Generators (two to four), or Welding Machines or Water Pumps, within 400 feet, Guniting Machine, Machine Mounted Post Hole Digger, Mude Jack, One Drum Machines without Tower or Boom, One Water Pump, One Welding Machine, Outboard or Inboard Motor Boat, Pull Broom (Power Type, Siphons and Pulsometer, Switchman, Striping and or Painting Machine (motor driven), Slurry Seal Machine, Track Jack, Temporary Heat, Throttle Valve, Tube Float, Tractaire, Wagon Drill, Multiple Tamping Machine (R.R.), Spike Machine (R.R.), Mechanical Heaters, Brush Burner, Vacuum Truck (Super Sucker and similar types).

FOOTNOTES:

A. Employees operating booms from 149Ft. to 199 Ft. including jib, shall receive an additional seventy-five Cents (.75) per hour above the rate. Employees operating booms over 199 Ft. including jib, shall receive an additional one dollar and twenty-five cents (\$1.25) per hour above the regular rate.

B. Employees operating scoops, pulls, or tractors hooked in tandem shall receive an additional one dollar (\$1.00) per hour above the regular rate.

C. Employees operating scoops, pulls, or tractors pulling any other hauling unit in tandem shall receive an additional one dollar (\$1.00) per hour above the regular rate.

D. Underground work - Employees working in tunnels, shafts, etc. shall be paid a thirty percent (30%) premium above the wage rate.

TRUCK DRIVER CLASSIFICATIONS

GROUP 1: Single/batches axle straight trucks; Batch trucks, wet or dry 3 (34E) axle or less; Single axle Grease and maintenance truck

GROUP 2: Single axle fuel and water trucks

GROUP 3: Single axle ""dog-legs"", and tandem truck or dog-legs; Winch trucks or A-frames when used for transportation purposes; Drivers on batch trucks, wet or dry over 3 (34E) batches and tandem axle grease and maintenance truck

GROUP 4: Tandem axle fuel trucks; tandem axle water trucks; butuminous distributors (two-man)

GROUP 5: Tandem trucks over 15 tons payload; Single axle semi trucks; Farm tractors hauling material; Mixer trucks (all types); Trucks pulling tilt-top trailer single axle; Single axle low- boys; Truck-mounted pavement breakers

GROUP 6: Tandem trucks or ""dog-legs""; Semi-water Truck; Sprinkler Truck; Heavy equipment-type water wagons, 5,000 gallons and under; butuminous distributors (one-man)

GROUP 7: Tri-axle trucks; Tandem axle semi trucks; Equipment when not self-loaded or pusher loaded, such as Koehring or similar dumpsters, track trucks, Euclid bottom dump and hug bottom dump, tournatrailers, tournarockers, Acey wagons or for similar equipment (12 cu yds or less); Mobile mixer truck; Tandem Axle trucks pulling tilt-top trailer; Tandem - Axle lowboy; Tri- Axle batch Truck; Tri-Axle grease and maintenance truck

GROUP 8: Tandem-tandem semi trucks; Truck mechanics and welders; Heavy equipment-type water wagon over 5,000 gallons; Tri-Axle Trucks pulling tilt-top trailer; Low-boys, tandem-tandem axle

GROUP 9: Low-boys, tandem tri-axle; Acey wagons up to and including 3 buckets; Equipment when not self-loaded or pusher loaded, such as koehring or similar dumpsters, Track Trucks, Euclid bottom dump and hug bottom dump, Tournatrailers, Tournarockers, Acey wagons or for similar equipment (over 12 cu yds.)

GROUP 10: Pick-up trucks

GROUP 11: Helpers; Greasers; Tire men; Batch board tenders; Warehouseman

GROUP 12: Acey wagon (over 3 buckets); Quad Axle Trucks; Articulating Dump

WELDERS - Receive rate prescribed for craft performing

operation to which welding is incidental.

=====
Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and

the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

State Adopted Rate Identifiers

Classifications listed under the "SA" identifier indicate that the prevailing wage rate set by a state (or local) government was adopted under 29 C.F.R. 1.3(g)-(h). Example: SAME2023-007 01/03/2024. SA reflects that the rates are state adopted. ME refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 01/03/2024 reflects the date on which the classifications and rates under the "SA" identifier took effect under state law in the state from which the rates were adopted.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described

in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

=====

END OF GENERAL DECISION"

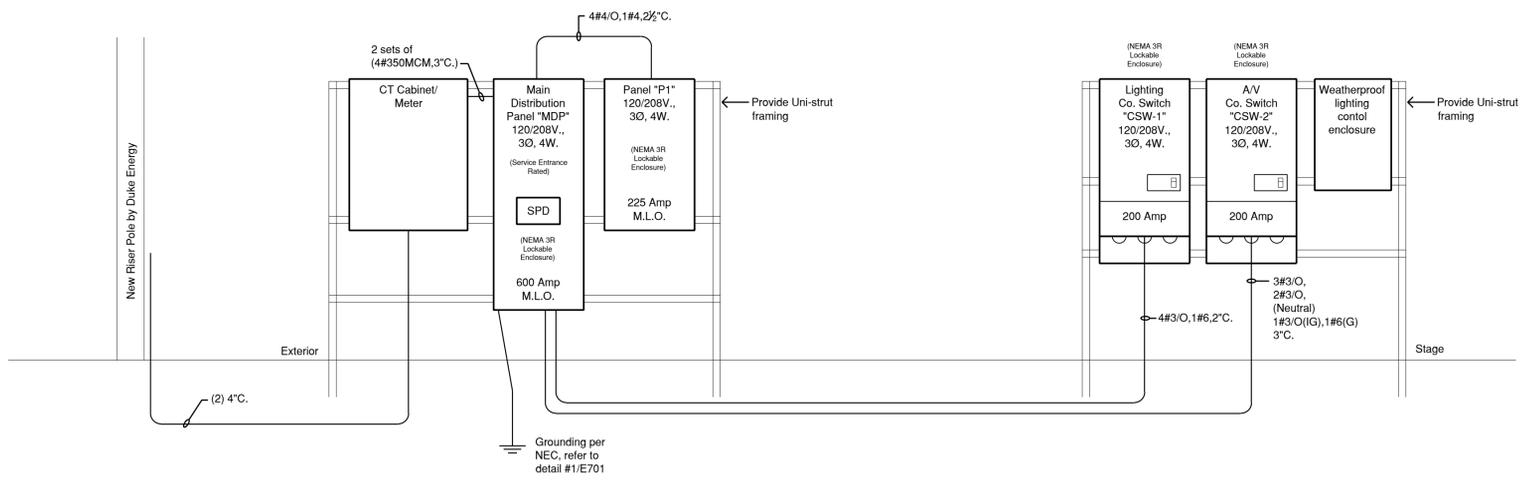

Light Fixture Schedule								
Type	Manufacturer	Model No.	Lamp Type	Voltage	Mounting	Description	Illustration (See Note 1)	Notes
'C1'	Ligman	UJE-95111-39w-VW-W40-xx-120/277V-DIM	LED / 4000K	120	Pendant (Bottom of fixture to be field adjusted to be flush with the wood louvers. Refer to "L" series sheets for elevations and sections)	Cylindrical LED pendant downlight. Aluminum housing (marine grade) with clear glass lens. Color/finish selection by Architect. Wet location listed.		5, 7
'S1'	ALUZ HAPCO	A5-ZOZO-STN-24"-27K-GSF-1W RSA-12-B-4-4"-1/Eye Bolt (11' AFG)-1/Pole Cap-1/Spun Base Cover-1/GFCI (10' AFG) qty. 2 RSA-12-B-4-4"-1/Eye Bolt (11' AFG)-1/Pole Cap-1/Spun Base Cover qty. 2	Dimmable (GSF) LED / 2700K	120	Pole (12') String / Cantenary	Exterior grade string/cantenary lighting. Socket spacing 24" O.C. Lengths (approximate) shown on site electrical plans. Verify with Owner if extra length is desired to provide "sag" between anchor points prior to ordering. Wet location listed. Type 18-8 stainless steel wire rope support. Poles by Hapco, Hapco Engineers to properly size pole.		6, 7
'S2'	LIGMAN	UAR-20992-W-W40	LED / 4000K	120	Pole	LED floodlight integrated with pole/housing. Adjustable heads. Wide flood distribution. Finish/color selection by Architect.		2
'S2'	WE-EF	FLC131 LED RAIL66 - 146-0531	LED / 4000K	120	Surface Stage Canopy	LED floodlight with aluminum housing. Knuckle mount. Narrow flood distribution. Finish/color selection by Architect.		5, 7

Notes:

1. Pictures are shown as a visual aid only, and may not depict specific attributes listed in this schedule.
2. Coordinate tilting/aiming of luminaire(s) in the field with Architect.
3. 0-10V LED dimming driver. Provide Manufacturer approved compatible dimmer where applicable (refer to lighting plans for dimmer location[s]).
4. ELV reverse phase dimming. Provide Manufacturer approved compatible dimmer where applicable (refer to lighting plans for dimmer location[s]).
5. Coordinate with ceiling and/or wall structure prior to rough-in and adjust as necessary to avoid installation conflicts.
6. Provide all connections as required by the Manufacturer. Verify exact quantities of all system components prior to ordering. Install all system components per Manufacturer's requirements.
7. Provide Manufacturer approved compatible dimmer where applicable (refer to lighting plans for dimmer location[s]).
